PEMBROKE CANADIAN BOND FUND

Investment Objective and Strategies

Pembroke Canadian Bond Fund (the “Fund”) seeks to provide investors with a high level of income and some capital growth while preserving capital by investing primarily in bonds, debentures and other debt instruments of Canadian and foreign governments and corporations. To achieve the Fund’s investment objective we invest primarily in high quality Canadian and foreign corporate bonds as well as Federal bonds.

Risk

The overall risk of the Fund is as described in the Simplified Prospectus. There were no material changes to the Fund over the financial year that affected the overall level of risk associated with an investment in the Fund. The Fund is suitable for investors who have a low tolerance for risk and are seeking a high level of income, capital preservation as well as some capital growth. Canso Investment Counsel Ltd. (“Canso”) is the investment manager of the Fund.

Results of Operations

For the year ended December 31, 2023, the Fund posted a return of 7.21%. In comparison, the Fund’s benchmark index, FTSE TMX Canada Universe Bond Index posted a 6.69% return. For the year ended December 31, 2022, the Fund posted a return of -9.41% compared to the Fund’s benchmark which posted an -11.69% return.

Over the past year the Fund outperformed the benchmark with strong performance from long single-A rated bonds issued by Enbridge, Hwy 407, Nav Canada, and Canadian Utilities which benefited greatly both spread tightening and the drop in yields experienced in Q4. Modestly detracting from performance was the Fund’s underweight in BBB-rated credit relative to the benchmark due to its added spread tightening over the year.

The U.S. Federal Reserve’s about-face on interest rates in the fourth quarter fueled a rally in almost every asset class, from speculative technology shares to junk bonds. The Treasury market posted its first annual gain since 2020 as slowing inflation bolstered views that the Fed’s campaign of interest rate increases is likely over. The Fed acknowledged that economic activity had slowed, and job gains moderated. The Fed also sketched out a potential path towards rate cuts.

The market may have gotten ahead of itself as investors clamored to invest cash before year end. The market is forecasting six quarter-point rate cuts throughout 2024. Investors have also been puzzled by the failure of a widely anticipated recession to materialize.

The Bank of Canada is concerned that inflationary pressures are broad-based. Economic growth stalled during the middle quarters of 2023 as higher interest rates are restraining consumer spending. The labour market is easing, and job creation has slowed. Wages are still rising at an elevated rate despite a modest increase in the unemployment rate.

At December 31, 2023, the total net asset value of the Fund was \$29.3 million as compared to \$27.2 million at December 31, 2022. The cash position was 0.19% of net asset value. The number of units outstanding in the Fund as at December 31, 2023 was 2.5 million compared with 2.4 million as at December 31, 2022.

Unrealized appreciation on investments at December 31, 2023 was -\$1.2 million as compared to -\$2.5 million at December 31, 2022 resulting in an increase in unrealized appreciation on investments of \$1.3 million. The Fund had net realized losses on investments sold during the year of \$0.3 million.

Fees and Expenses

During the year, the Fund incurred a total of \$0.1 million in operating expenses. The management expense ratio (“MER”) for unitholders was 0.41%. There are no management fees charged to the Fund since January 1, 2018 as the management fees are charged directly to the unitholders outside the Fund. Refer to the Management Fees section for further details on this.

Unitholder Activity

Throughout the year, \$4.1 million flowed into the Fund by way of subscriptions and \$3 million flowed out of the Fund as a result of redemptions.

Related Party Transactions

Pembroke Private Wealth Management Ltd. (“PPW”) is the Fund’s Manager. The Fund Manager provides the day-to-day management of the business and operations of the Fund. The fees paid to the Fund Manager are shown in the Management Fees section of this report. The related party transactions take place in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Recent Developments

Outlook

Going forward, the Fund continues to maintain a sizable position of tax efficient discount Canada bonds which can be used to take advantage of future credit opportunities in the event of a market downturn. The Fund begins 2024 with a healthy yield of 4.7% and duration of 6.3 years which remains marginally short of the benchmark to defend against volatile government bond yields as inflation persists above the target of central banks.

Past Performance

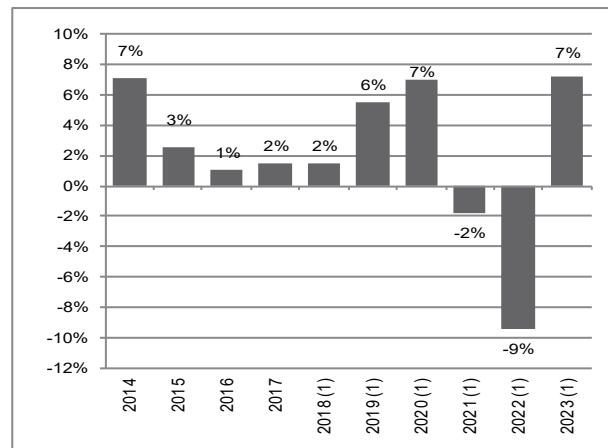

The indicated rates of return are the historical annual compounded total return changes in unit values and reinvestment of all distributions and do not take into account sales, redemptions, distributions or other optional charges that would have reduced returns. Mutual funds are not guaranteed, their values may increase or decrease and past performance may not be repeated.

The Fund's performance numbers assume that all distributions are reinvested in additional units of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes, whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gains or increase your capital losses when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

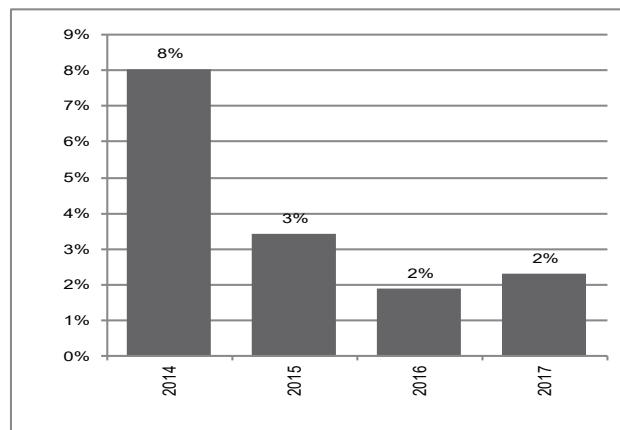

Year-by-year returns

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year. The percentage figures indicated have been rounded to the nearest whole number due to space constraints.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the financial years indicated. This information is derived from the Fund's audited annual financial statements. The information presented is based on prescribed regulations and, as a result, is not expected to sum due to the increase (decrease) in net assets attributable to holders of redeemable units being based on the average units outstanding during the year and all other numbers being based on the actual units outstanding at the relevant point in time.

Net assets attributable to holders of redeemable units, end of year ⁽⁴⁾	11.63	11.21	12.75	13.34	12.85

(1) This information is derived from the Fund's audited annual financial statements.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) in net assets attributable to holder's of redeemable units is based on the weighted average number of units outstanding over the financial year.

(3) Distributions were paid in cash and/or reinvested in additional units of the Fund.

(4) This table is not intended to be a reconciliation of beginning to ending net assets per unit.

(5) Class O units of the Fund were converted to Class A units on January 31 2018.

Net asset value per unit (\$)	11.63	11.21	12.75	13.34	12.85

(1) This information is provided as at December 31 of the year shown.

(2) The management expense ratio ("MER") is calculated in accordance with National Instrument 81-106, based on expenses for the stated year (including Harmonized Sales Tax, Goods and Service Tax, income tax and interest) but excluding foreign withholding taxes, commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the year. PPW may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. The Fund expenses were waived or absorbed for the years presented. The waiver or absorption of operating expenses is expected to continue for an indefinite period of time and can be terminated by PPW at its discretion and without prior notice.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

(5) Class O units of the Fund were converted to Class A units on January 31 2018.

¹ Management fee rate was reduced from 0.10% to nil as of November 1, 2020

Management fees paid directly by unitholders of the Fund to PPW through a redemption of units was \$80,602 for the year ended December 31, 2023.

Under the Pembroke Family Advantage Program, the value of family holdings of all family members designated by the investor will be considered to determine the management fee applicable to all family members. In order to benefit from the Pembroke Family Advantage Program, family members must be designated by the investor using the form prepared by PPW and must be approved by PPW prior to any management fee reduction being applicable. Management fees are determined based on the amount of assets under management with PPW and Pembroke.

All management fees were used by the Manager to pay costs for managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, and providing other services. For the year ended December 31, 2023, none of the management fees received by the Manager were used to fund commission payments and other dealer compensation (collectively "distribution-related costs") paid to registered dealers and brokers for units of the Fund bought and held by investors.
